(54) Title: SPECTACLE SUPPORT SYSTEM

(57) Abstract: A support system for a pair of spectacles, comprises an item of headwear, such as a cap, hat, visor or helmet, including a portion such as a brim or peak which, when in use, projects beyond the circumference of the head of a wearer above the eyes; and one or more support rods or strings connected to the projecting portion and having means such as a hook or magnet at the or each free end for detachable connection to the temple arms of a pair of spectacles. The rods or strings can be adjustable in length and position for the comfort of the wearer.
